

# Design and Technology

## *Curriculum Intent Statement*

During their time at Oaklands Junior School pupils will acquire a broad range of subject knowledge from working on a variety of practical and creative projects. Through an iterative process of designing and making pupils will be taught the knowledge and understanding and be able to practice and refine the skills and processes that will enable them to achieve and make products that solve real and relevant problems.

Design and technology at Oaklands will aim to develop enquiring minds and creative thinkers through allowing them to use their imaginations and draw on other subjects such as maths, science, art and computing when following the planning, design, testing and evaluation process.

Aiming to instil a love of cooking pupils will be given opportunities to apply the principles of nutrition and a healthy diet through creating a variety of dishes using a range of cooking techniques.

Our intent is that whilst at Oaklands our pupils leave with the an enthusiasm for the subject and be able to use the skills and knowledge they have acquired to contribute to todays society.
